## Dinosaur Fun Facts:

- 1) Not all of Canada's fossil treasures are from Western Canada. The Joggins Fossil Cliffs in Nova Scotia preserves a rainforest like ecosystem from the Carboniferous period, 300 million years ago!
- 2) Toronto is home to the Royal Ontario Museum, the largest museum in Canada! It houses a massive collection of dinosaur fossils and much, much more!
- 3) 214 million years ago, during the Triassic period, a 5 Kilometer (3.1 mile) wide asteroid struck Quebec, creating the Manicouagan Impact Structure. Today it forms an important reservoir.
